A device that is specifically designed to read electronic Books on a screen, to a 1930 manifesto by Bob Brown, written after seeing his first "Talkie" (movie with sound). He titled the readings, playing with the idea of "Talkie." [8] In his book, Brown says that the movies have overcome the book by creating the "talkies" and, as a result, reading should find a new medium: a simple reading corner that I can carry or move, attach to any Ancient elastic light plug and read the novels of one hundred thousand words in 10 minutes if I want. Brown's notice, however, was more focused on reforming spelling and vocabulary, which in the middle ("it is time to take the upholstery" and begin "a bloody revolution of the word"): introduce large amounts of portmantau symbols to replace normal words and the punctuation to simulate action or movement; Therefore, it is not clear if this conforms to the history of "electronic books" or not. Later, electronic readers. In an article, Jennifer Schuessler writes: "The corner, Brown argue 'register directly in the throbbing a © ter'. [9] Brown believed that the electronic reader (and his notions to change the text in Sa) would bring a completely new rhythm or song, instead of just a remix of a family song. Michael S. Hart (left) and Gregory Newby (right) of Project Gutenberg, at Hackers on Planet Earth (HOPE) Conference, 2006 Michael S. Hart (1971) Despite the extensive earlier history, several publications report Michael S. Hart as the inventor of the e-book, [24][25][26] In 1971, the operators of the Xerox Sigma V mainframe at the University of Illinois gave Hart extensive computer-time. Seeking a worthy use of this resource, he created his first electronic document by typing the United States Declaration of Independence into a computer in plain text. [27] Hart planned to create documents using plain text to make them as easy as possible to download and view on devices. Early implementations After Hart first adapted the U.S. Declaration of Independence into an electronic document in 1971, Project Gutenberg was launched to create electronic copies of more texts, especially books.[27] Another early e-book implementation was the desktop prototype for a proposed notebook computer, the Dynabook, in the 1970s at PARC: a general-purpose portable personal computer capable of displaying books for reading.[28] In 1980, the U.S. Department of Defense began concept development for a portable electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for technical maintenance information called project PEAM, the Portable Electronic delivery device for the PEAM is a supplication of the PEAM is a supplication for testing in 1986, and tests were completed in 1987. The final summary report was produced in 1989 by the U.S. Army Research Institute for the Behavioral and Social Sciences, authored by Robert Wisher and J. Peter Kincaid. [29] A patent application for the PEAM Titled "Aparatus to Deliver Procedural Type Instructions," was presented by Texas Instruments on December 4, 1985, listing John K. Harkins and Stephen H. Morriss as inventors. The first portable electronic book, the "personal electronic book reader who could read electronic books that were stored on CD. One of the electronic publications that could be played in the Data Discman was called the Future Library. [31] The first electronic books were usually written for specialized areas and a limited audience, intended to be read only by small and dedicated interest groups. The scope of these e-books included technical manuals for hardware, manufacturing techniques and other topics. [Cita necessary] In the 1990s, the general availability of the Internet made the transfer of electronic files much easier, including electronic books. [Cita necessary] In 1993, Paul Baim launched a Freeware Hypercard stack, called Ebook, which allowed easy import of any text file to create a concordant version similar to an e-pocket book. One notable feature was the automatic follow-up of the last page read, so that upon returning to the 'book' it was taken back to where it had previously left. The title of this stack may have been the first instance of the term 'electronic book' used in the modern context. In the late 1990s, a consortium formed to develope the Open eBook format as a way for authors and publishers to provide a single source-document which many book-reading software and hardware platforms could handle. library e-book distributors and loan models continued to increase in the coming years. From 2005 to 2008, libraries experienced a 60 per cent growth in electronic book collections. [39] In 2010, a Public Library Funding and Access to Technology Survey of the American Library Association [40] found that 66% of U.S. public libraries were offering e-
books,[41] and a major movement in the library industry began to seriously examine issues related to e-book loans, recognizing a "launch point" when e-book technology would be widely established. [42] The content of public libraries can be downloaded to electronic readers using application software such as Overdrive and Hoopla. [43] The U.S.
National Library of Medicine has provided for many years PubMed, a complete bibliography of medical literature. At the beginning of 2000, NLM established the PubMed Central Repository, which stores full text versions of many articles and medical journal books, through cooperation with academics and editors in the field. y y rotua ed sohcered sol

[45] Pattern-driven acquisition (PDA) has been available for several years in public libraries, allowing suppliers to simplify the procurement process by offering that they match a library's selection profile with the provider's ebook titles. [46] The library catalog is populated with records for all electronic books that match the
profile. [46] The decision to purchase the title is left to the employers, although the library budget. [46] The 2012 meeting of the American University Press Association included a panel on the PDA of books produced by
university presses, based on a preliminary report by Joseph Esposito, a digital publications consultant who has studied PDA implications with a scholarship from the Andrew W. Mellon Foundation. [47] Challenges Although the demand for e-book services in libraries has increased in the first two decades of the 21st century, difficulties prevent libraries
from providing some e-books to customers. [48] Editors will sell e-books to libraries, but in most cases they will only give libraries a limited license to the title, which means that the library does not have the e-text, but it is allowed to circulate it ednev ednev es eug ocin<sup>3</sup> Artcele orbil nu eug apucoerp sel serotide sol a eugrop lepap otamrof ed senoicide

[50] In July 2010, the online booker Amazon.com reported sales of electronic books for its patented Kindle outnumbered sales of hard-cover books for the first
time during the second quarter of 2010, saying that he sold 140 e-books for every 100 hard-cover books, including Hardcovers for which there was no digital edition. [51] In January 2011, electronic book sales are even much larger than the hard top or e-
